ISO/IEC 25010 The quality model is the cornerstone of a product quality evaluation system. The quality model determines which quality characteristics will be taken into account when evaluating the properties of a software product.

### **ISO 25010**

ISO 25010 is a great framework to define software metrics important for a particular project. It is not a comprehensive, detailed map, but rather a guide you can use, depending on the circumstances. Every development project has different priorities and metrics, and this standard allows enough leeway to work with all of them.
